

Name Narendra Kumar S

Date 29-08-2025

Task :

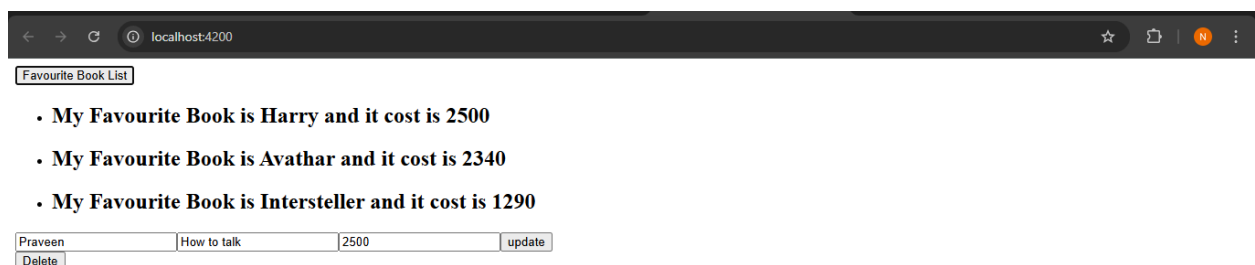

- 1.call the FavouriteBookApi from angular and display the values in the form
 - user can update the name ,price in the form
 - when submit button is pressed,call the updatebook in the angular
 - include the token via interceptor when calling the update api
 - also put the delete button when clicked call the delete api

Solution:

Favourite Book List :

```
allFavbooks() {  
  this.bookService.getFavbook().subscribe({  
    next: (books) => {  
      this.favbook = books;  
      console.log("Books loaded:", this.favbook);  
    },  
    error: (err) => {  
      console.error("Error loading books:", err);  
    }  
  });  
}
```

Output:

User Form :

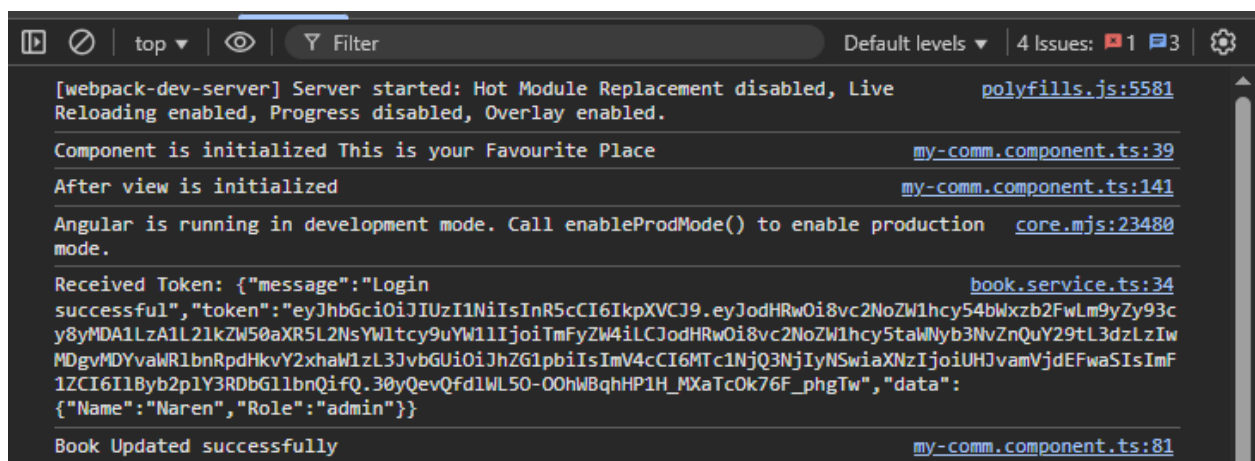

Favourite Book List

Praveen How to talk 2500 update

Delete

```
<button (click)="allFavbooks()">Favourite Book List</button>
<ul>
  <li *ngFor="let favbook1 of favbook">
    <h2><label>My Favourite Book is {{favbook1.title}} and it cost is
    {{favbook1.price}}</label>
  </h2>
</li>
</ul>
<input type="text" [(ngModel)]="authourname" placeholder="Enter authour
name">
<input type="text" [(ngModel)]="title" placeholder="Enter title">
<input type="text" [(ngModel)]="price" placeholder="Enter price">
<button (click)="update()">update</button>
```

Output:

```
[webpack-dev-server] Server started: Hot Module Replacement disabled, Live
Reloading enabled, Progress disabled, Overlay enabled.

Delete Button :

Code:

```
delete() {
  this.bookService.deletebook(11).subscribe({
    next: (response) => {
      console.log("Book deleted successfully:", response);
      this.bookService.getallbook().subscribe(
        books => this.my_fav_book = books
      );
    },
    error: (err) => {
      console.error("Error deleting book:", err);
    }
  });
}
```

```
deletebook(id:number) {
  return this.http.delete<string>(`${this.apiUrl}/DeleteBook/${id}`)
}
```

Before Deletion:
