

Name : Narendra Kumar S

Date : 12-08-2025

Mini Project :

1 Ticket Booking Application Using C#

Solution:

Home Controller

```
using Microsoft.AspNetCore.Mvc;  
using MovieTicket.context;  
using MovieTicket.Models;  
using System.Diagnostics;  
using System.Linq;
```

```
namespace MovieTicket.Controllers
```

```
{  
    public class HomeController : Controller  
    {  
        public AppDbContext context;  
        private readonly ILogger<HomeController> _logger;  
  
        public HomeController(ILogger<HomeController> logger, AppDbContext context)  
        {  
            _logger = logger;  
            this.context = context;  
        }  
  
        public IActionResult Index()  
        {  
            return View();  
        }  
  
        public IActionResult Privacy()  
        {  
            return View();  
        }  
  
        public IActionResult BookTicket()  
        {  
            return View();  
        }  
    }  
}
```

```

public IActionResult Filter(string gender)
{
    var movies = context.GetMovieList().ToList();

    if (!string.IsNullOrEmpty(gender))
    {
        movies = movies
            .Where(m => m.gender == gender).ToList();
    }

    ViewBag.TotalMovies = movies.Count();
    ViewBag.AverageAge = Math.Round(movies.Average(m => m.age), 2);

    return View("MovieDetail", movies);
}

```

```

public IActionResult DeleteDetail(string name)
{
    var movie = context.Movies.FirstOrDefault(m => m.name == name);
    context.Movies.Remove(movie);
    context.SaveChanges();
    return RedirectToAction("MovieDetail");
}

```

```

public IActionResult AddDB(movie _movie)
{
    context.Movies.Add(_movie);
    context.SaveChanges();
    return RedirectToAction("MovieDetail");
}

```

```

public IActionResult MovieDetail()
{
    var movies = context.Movies.ToList();
    ViewBag.TotalMovies = movies.Count;
    ViewBag.AverageAge = Math.Round(movies.Average(m => m.age), 2);
    return View(movies);
}

```

```

public IActionResult ViewDetail(string name)
{

```

```

        var movie = context.Movies.FirstOrDefault(m => m.name == name);
        return View(movie);
    }

    [ResponseCache(Duration = 0, Location = ResponseCacheLocation.None, NoStore =
true)]
    public IActionResult Error()
    {
        return View(new ErrorViewModel { RequestId = Activity.Current?.Id ??
HttpContext.TraceIdentifier });
    }
}
}

```

Model

```

using System.ComponentModel.DataAnnotations;

namespace MovieTicket.Models
{
    public class movie
    {
        public int Id { get; set; }
        [StringLength(40, MinimumLength = 5, ErrorMessage = "Name Length should be greater
than 5")]
        public string name { get; set; }
        public string gender { get; set; }

        public DateOnly dateofbirth { get; set; }
        [Range(5, 100, ErrorMessage = "Age should be greater than 5")]
        public int age { get; set; }
    }
}

```

View

```

@{
    ViewData["Title"] = "Booking Page";
}

@model movie

<div class="container mt-4">
